Feature Priority

Survey revealed 100% experienced meal loss, averaging 2.97 meals and ₹225 lost per semester. Current WhatsApp exchanges show moderate frustration (2.25/5) with poor efficiency. Notably, 91.43% expressed adoption intent for a structured platform, with Instant Matching as the most desired feature.

Solution : MealSwap is a structured meal-transfer platform replacing WhatsApp groups. Core feature — instant, hall-based matching to quickly connect students with unused meals to nearby takers. Supports both free giveaways and price-based exchanges, addressing all willingness-to-pay segments. Given 91.43% adoption intent, this directly targets validated student pain points and demand.
